Please find enclosed the 2025 schedule of fees and charges, including methods and timing of payments.

The Commonwealth Government DMI funding model enters year four of an eight-year transition period (2022 to 2029 inclusive). This new model results in a decrease in recurrent per student funding in both dollar and real terms. This means fees will need to be raised in order to maintain total per capita income and to continue to offer the services expected by families.
